AKSHAY ADATE

Bangalore, India | +91 86005 47187
Email:contact.akshayna@gmail.com | LinkedIn | Portfolio

SUMMARY

Senior Full-Stack & AI Engineer (6+ years) with experience building secure, scalable, cloud-based applications using **React, Python, and Node.js** on **AWS and Azure**. Experienced in developing **Conversational AI, RAG systems, and Agentic AI workflows** using **LangChain, LangGraph, vector databases, and LLMs**.

Hands-on experience developing **chatbots** and **voicebots** using **Dialogflow, IBM Watson,** and **Twilio**, along with prompt engineering and multi-agent orchestration.

Experienced in technical ownership, client collaboration, agile delivery, mentoring, and end-to-end solution development, with a focus on building reliable, scalable, and user-friendly AI solutions.

SKILLS & TECHNOLOGIES

Backend Technology: Node.js, Python, Rest API, LangChain, LangGraph
Frontend Technology: React
LLM and Agents: LLMs, RAG, Agentic AI, Prompt Engineering, MCP
Development AI Tool: Claude code, Copilot
Conversational AI: Dialogflow ES/CX, Azure Bot Framework, IBM Watson
Cloud & DevOps: AWS, Azure, CI/CD
Observability: Monitoring, Power BI Dashboards
Databases: VectorDB (Pinecone, ChromaDB, FAISS), MongoDB, PostgreSQL
Tools & Frameworks: Git, Postman, Jira, Service Now
Soft Skills: Agile Delivery, Client Collaboration, Mentoring, Code Reviews

HIGHLIGHTS

- Text-to-Speech (TTS) & Speech-to-Text (STT) integration in Voicebots
- Live transcript implementation for Voicebot conversations
- Power BI dashboard design & analytics reporting

WORK EXPERIENCE

Eli Lilly – AI Engineer **April 2023 - Present**
Bangalore, India

Technology used – Node JS, React, Python, RAG, Power BI

Experience

- Delivered production-grade **conversational AI solution** using **React, Node.js** and **RAG pipeline**, powering the frontend and backend of AI-driven enterprise applications.
- Designed and deployed LLM-powered **Agentic AI workflows** using **LangGraph** and **LangChain frameworks** to automate processes, detect anomalies and AEPCs, handle delivery-related queries, personalize responses, and support compliance in regulated pharma environments.
- Implemented **AI guardrails** to filter harmful content, detect sensitive information, and ensure chatbot responses are safe and compliant.
- **Integrated the chatbot with Salesforce and Genesys** to enable seamless **live-agent handoff**, including customer context transfer, agent routing, and conversation history for a smooth escalation workflow.
- Actively using **GitHub Copilot** and **Claude Code** for development.
- **Automated CI/CD pipelines** using **Azure DevOps and CloudFormation**, making deployments faster and reducing manual work.
- **Led GenAI projects**, managed the **technical roadmap for RAG pipelines**, and **mentored a team of 5 engineers** through code reviews and best practices.

Impact Highlights:

- **40% faster deployments** through CI/CD and infrastructure automation.
- **Reduced dependency on human agents by 70%, saving $5M annually.**
- **Improved platform reliability** via real-time observability workflows.

IBM – Conversational Engineer **May 2022 - March 2023**

Mumbai, India

Technology used – Python, Node.js, IBM Watson, Genesys, Twilio, STT/TTS, Conversational AI (Chatbot and Voicebot), Cloud APIs

Experience

- **Built AI automation workflows** using Python, Node.js, and **IBM Watson**, boosting process efficiency and conversational intelligence across enterprise use cases.
- **Integrated Genesys, Twilio, and cloud APIs** to deliver multichannel chatbot/voicebot solutions, enabling scalable customer interactions across IVR, web, and messaging platforms.
- **Developed an AI-powered WhatsApp Voicebot** for **Asian Paints** vendors, enabling real-time voice-based order placement through STT/TTS, conversational AI, and automated order processing.
- **Led system architecture decisions** in partnership with cross-functional teams, ensuring quality, reliability, and maintainability.

Impact Highlights:

- **Improved automation speed and accuracy** across enterprise workflows (2x gain).
- **Reduced system latency by 40%**, enhancing performance for customer-facing AI journeys.
- **Delivered multilingual IVR & AI solutions** for large enterprise clients.
- **real-time transcript analysis** and **sentiment detection** to support live agent decision-making

Quantiphi – Framework Engineer **October 2020 – May 2022**

Mumbai, India

Technology used – Node.js, React, Angular, Dialogflow ES/CX, GCP, Firestore, Webhooks, NLP, Omnichannel Platform (Chatbot and Voicebot)

Experience

- **Designed and deployed large-scale Conversational AI solutions (Chatbot and Voicebot)** for government and enterprise clients using Dialogflow ES & CX, focused on NLP accuracy, scalable architecture, and multilingual support.
- **Built knowledge connectors, dynamic FAQ systems, fallback strategies, and advanced conversation flows** to boost automation coverage and end-user experience.
- **Designed and deployed** large-scale Conversational AI solutions (Chatbot and Voicebot) on **Google Cloud Platform** for government and enterprise clients using Dialogflow ES & CX, focused on NLP accuracy, scalable architecture, and multilingual support.
- Build **multiple voice bot flows** using Dialogflow ES which help to **captured** details like **contact number, users information, SSN number** and gives personalized response by calling API.
- Handled speech synthesis using **SSML (Speech Synthesis Markup Language)** to improve users experience.
- **Engineered real-time integrations** via webhook-based orchestration, enabling seamless connectivity with backend systems and public services.
- **Developed scalable web applications** using Angular, Node.js, and Firestore, supporting high user traffic and secure data handling.

- **Owned sprint planning and technical delivery**, **mentored a team of 5 engineers**, and drove code quality standards across cross-functional teams.

Impact Highlights:

- **Scaled platform to support millions of users** in nationwide government services.
- **Delivered multilingual conversational experiences**, significantly improving accessibility and reach.
- **Improved response accuracy and consistency** across automated conversations

EDUCATION & CERTIFICATES

MCA (Master of Computer Application) Aug 2017 - May 2020
Pune University, Pune, India

BSC-IT (Bachelor of Science – Information Technology) July 2013 – May 2017
Mumbai University, Mumbai, India

Certifications

- DeepLearning.AI - Prompt Engineering Certificate
- Databricks - Generative AI Fundamentals Certificate
- PL-300: Microsoft Power BI Data Analyst Associate
- Docker, Inc - Docker Foundation Professional Certificate
- Google Cloud Certified Professional Cloud Architect
